PROFILE:

Detail-oriented Data Analyst with a background in Electronics and Communication Engineering and hands-on experience in end-to-end data analysis workflows — from data collection and cleaning to dashboard development and business insight generation. Proficient in Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Power BI, and Tableau. Built interactive dashboards analyzing real-world datasets across smartphone markets and road safety, translating raw data into actionable KPIs and visual stories for decision-making. Eager to contribute analytical thinking and business intelligence skills to a data-driven team.

TECHNICAL SKILLS:

- **Programming & Querying:** Python, SQL (JOINS, Aggregations & GROUP BY, Window Functions, Data cleaning in SQL)
 - **Data Analysis:** Data Cleaning, Exploratory Data Analysis (EDA), Data Modeling, ETL, Statistical Analysis, KPI Reporting, Data Visualization, Interactive Dashboards, Data Transformation.
 - **Libraries:** Pandas, NumPy, Matplotlib & Seaborn.
 - **Visualization Tools:** Power BI, MS Excel, Tableau.
-

PROJECTS:

Smartphone Market Analysis Dashboard | Power BI

- Developed an interactive Power BI dashboard to analyze smartphone specifications and pricing trends.
- Performed data cleaning and transformation using Power Query for accurate analysis.
- Created KPI cards and visualizations to compare brand performance and smartphone features.
- Generated insights on RAM vs price, screen resolution, and battery performance across brands.

Road Accident Analysis Dashboard | Tableau

- Developed an interactive dashboard using Tableau to analyze road accident data and key safety metrics.
- Used Parameters and Calculated Fields to create dynamic analysis and improve dashboard interactivity.
- Visualized accident trends by state, time of day, weather conditions, and vehicle type to generate insights.

Global University Analysis Dashboard | Python | Streamlit

- Developed an interactive dashboard using Python, Pandas, Matplotlib, Seaborn, and Streamlit.
 - Implemented dynamic filters, KPI cards, and interactive visualizations.
 - Analyzed university rankings, student population, faculty strength, campus area, and establishment year.
 - Generated insights using responsive dashboards, interactive filters, and data visualizations.
-

Certifications & Training:

Data Analytics with Python –Elysium Academy

| Jan 2026 – Mar 2026

- Collected, cleaned, and transformed datasets using Python and SQL.
 - Performed exploratory data analysis on structured datasets.
 - Built interactive dashboards using Microsoft Power BI and Tableau.
 - Created reports to identify trends, KPIs, and business insights.
 - Used Python libraries such as pandas, NumPy, and Matplotlib for analysis.
-

EDUCATION:

• **B.E – Electronics and Communication Engineering**
St. Michael College of Engineering & Technology, Sivaganga

CGPA | 8.06

| 2022 – 2026
